

ELECTRICAL SPECIFICATIONS

EWP-L

50/60 Hz, single phase
115 VAC ±10%
230 VAC ±10%

EWP-L (B)

13 Watt avg.
0.8 Amp max.
0.4 Amp max

EWP-L (C-F)

23 Watt avg.
1.1 Amp max.
0.5 Amp max.

SHIPPING WEIGHT

Approx. 7 lbs. (3.2 kg)
(Plastic liquid ends)

Approx. 9 lbs. (4.1 kg)
(Stainless Steel liquid ends)

OPERATING CONDITIONS

Ambient Temperature: 32 to 122°F (0 to 50°C)

Liquid Temperature: PVC liquid ends: 32 to 104°F (0 to 40°C)
PP, PVDF, SS liquid ends: 32 to 140°F (0 to 60°C)
Below 32°F (0°C), pump is limited to 70% of maximum pressure.
Liquid cannot freeze.

Relative Humidity: 30% to 90% non-condensing

Pumps should always be shielded from direct exposure to the elements.

CONTROLLER SPECIFICATIONS

Controller Type		EWP-L
Operation mode	MAN	0-100% stroke rate ^{Note1} (Max. 360spm)
	EXT	4-20 mA in proportion to 0-360 spm
		0-6 Hz in synchronous with 0-360 spm
	Status LED	Red LED: Flashes when in EXT mode.
	LED	Green LED: Blinks synchronously with stroke when the pump is running. Red LED: Lights when a STOP signal is input.
Dial	Simple function dial (Stroke rate. PLS/ANA mode selector)	
Control functions	STOP	Pump stops when STOP signal input.
Input	Pulse	Dry contact or open collector ^{Note2}
	Analogue	4-20 mADC (Input resistance 220 Ω)
	STOP	Dry contact or open collector ^{Note2}
Power Voltage		100 240 VAC 50/60 Hz ^{Note3}

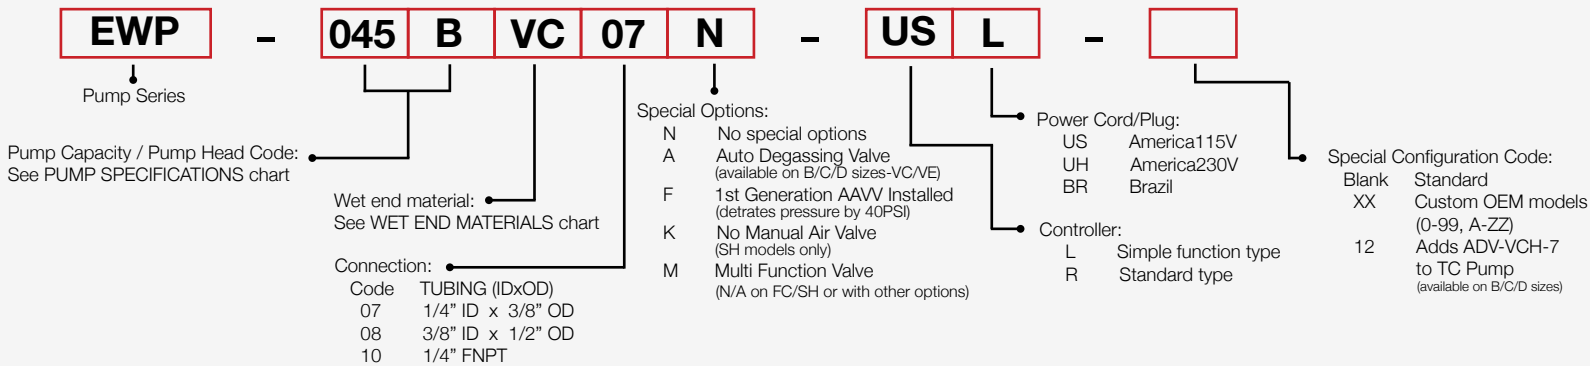

Note 1: Use the stroke rate adjusting dial to change the operation functions.
Dial scale is approximate for reference only.

Note 2: The maximum applied voltage to the contact is 5 VDC at 2.3 mA.
The minimum application load of the relay or switch should be 1 mA or below.

Note 3: Observe the specified power voltage range or failure may result.
The allowable power voltage range is 90–264 VAC.

Notes:

1. Addition of a Multifunction valve increases the overall length by 0.10".
2. The overall length by 0.10".
3. Addition of a Multifunction Valve increases discharge height by 2.62". The Auto Degassing Valve increases discharge height by 1.82"
4. Addition of a Multifunction Valve increases overall liquid end height by 1.25". The Auto Degassing Valve increases overall height by 1.82"

EWP-L SERIES SPECIFICATIONS

Engineered for both reliability and versatility, the **EWP-L** features external analog and simple digital pulse input control as well as manual control with an 1800:1 turndown ratio. Its high-speed 360 strokes-per-minute operation ensures consistent performance, while its robust priming capability and durable construction make it the optimal choice for any cost-effective, high-precision chemical injection applications.

Simple operation and adjustment with two control knobs, flowrates up to 6.7 GPH (25 l/h) and pressure capability to 300 psi (20 bar) enable the EWP-L to easily fit into most applications.

Flexible Installation

An optional quick-access mounting base enables the EWP-L to be easily wall mounted or quickly removed from an installation without the need for tools.

Rugged Housing

The EWP Series pumps are sealed and rated to an IP66 protection class (water and dust-proof) even without the chemical splash guard.
